---

### EUNA - CO-LAB intro MOOC 2nd edition

**Thank you for enrolling in the course.  
For more information on how to  
proceed, please click the  
Announcements tab above the video.**

[Unenroll from the course](#)

### Start date

---

25 September 2017

### Duration

---

The course will start on the 25th  
September and will go on for 6.5 weeks -

### Why Collaborative Learning

Being able to collaborate effectively is a valuable 21st-century skill, yet teaching about or through

collaboration remains rare in schools because of a lack of understanding of what real collaboration in an educational setting means, and because existing policy conditions do not always enable it to flourish. Practitioners need a dedicated space and time to experiment and better understand what collaborative teaching and learning means in practice. This course is designed to give you that opportunity.

### What the course offers

This introductory course will help you to better understand:

- What is collaborative learning?
- How can I carry it out effectively in my classroom?
- What tools can I use to assess collaborative learning?
- How can I collaborate with fellow teachers to facilitate collaborative learning?

You will:

- Receive advice from experts and peers, as well as concrete suggestions about how to carry out collaborative teaching and learning in your classroom;
- have access to videos of inspiring practice and other support material;
- find a community of like-minded professionals on the course who can support you in improving your classroom practices;
- discuss, share, and reflect on these topics;
- use a variety of online tools and social media to communicate and engage in some peer-review activities.

*CO-LAB (<http://colab.eun.org/>), the project this MOOC is part of, is focused on making collaborative teaching and learning a reality in the classroom. CO-LAB is funded by the European Commission's*

one week for each module and 2.5 weeks to carry out the final activity. The Course Introduction opens upon registration. Duration of each module is estimated at 4-5 hours.

## Target audience

---

The course is targeted at primary and secondary teachers, teachers in initial training and teacher trainers from Europe and beyond. Heads of schools and other stakeholders, such as policy makers, may also benefit from the course as an introduction to collaborative teaching and learning (Module 1) and to collaboration at school level (Module 4). Level of the course: introductory.

## Certification

---

You will receive digital module badges for every completed module of the course as well as a course badge and a course certificate upon completion of the full course. All badges can be exported to the [Mozilla Badge Backpack](#).
