Didactic course

<http://www.descrittiva.it/calip/0405/volo-liguria.htm>

4.4 Didactic course

Read the didactic courses featured in this section and share below at least two ways in which you can adapt these activities to teach a topic of your subject

PADLET

Introduction to subject matter

4.1 Introduction to subject matter

Has your opinion changed after watching the video? Are you convinced even more in importance of climate monitoring? Please reflect on these questions below.

In practice: Didactic courses

I propose simple experiences for my students in kindergarten

I parchi italiani dal cielo

2.5 In practice: Didactic courses

Mohammed speaks in the video about how he adapted the lesson to fit the needs of his students. He mentions that he used the fact that the students had already learned about the subject with other teachers, and this helped him build his lesson better. Can you think of any practical ways you could also adapt this lesson to your students' context?

Careers

Our experience in kindergarten

2.4 Careers

Do you have any students who are interested in becoming a meteorologist or a hydrologist? How do you think you can raise their awareness for these careers? Share your ideas below!

PADLET

Do some research on the Astrobiologist job and share below if you have any such professionals in your country and how you can involve them in your classroom activities
